Nov. 1897 2, 1897

1. The first group of authors (e.g., [1, 2]) considers the problem of the stability of the motion of a system of particles in the field of a central body. The results of the calculations show that the motion of the particles is stable for a wide range of initial conditions. The authors also show that the motion of the particles is stable for a wide range of initial conditions.
